Hi Don and John,
Dennis and I made a site visit today. In the attachments, I took photos of where the first stake starts and the last one ends. I measured the distance between these two areas and came up with 580 LF. During our previous discussion, I recalled that we discussed 170 or 270 lf. So I just want to make sure that this is correct before proceeding with the cost estimate. Also, we will be providing a cost estimate for the construction of the curbswall and related irrigation and landscape work.
Please confirm.

Thank you,
Audrey
